

# Evolution.

## Now conservatories come in clear, natural or blue.

(But whatever you choose it'll always be green)

Introducing futuristic energy efficient technology for today's conservatory glazing.

- **Solar control**

Blue glass help keep internal temperatures cool whilst still maintaining excellent light transmittance.

- **Self cleaning**

Using UV light and rain to actively break down dirt so your windows stay cleaner longer.

- **Heat reflecting**

Low emissivity glass has been developed for the inside of the pane to reflect heat back into the room.

- **Toughened for strength**

All Evolution glass is toughened to EN12150 Class A.

- **Noise reduction**

Using this product opposed to polycarbonate roofing material, the noise from rainfall is alleviated.

Designed for all year round use.
